

Redevelopment works to Grange Paddocks Pool & Gym

Grange Paddocks Pool & Gym

Refurbishment of the existing leisure centre is proposed to build a first floor flat roofed extension over the existing reception area and changing rooms to accommodate a new 507 square metre gym and a single storey flat roofed extension some 136 square metres in size on the northern elevation of the main building which will accommodate a new 80 station gym space, with various fitness zones with views over the Paddocks. This extension will fill in the gap between the two existing buildings on the site.

The existing gym will be converted into a second smaller studio and the changing facilities will be refurbished to create high specification changing facilities.

A new circulation route is also proposed around the northern side of the outdoor changing building to provide pedestrian access to the sports pitches.
