(E) MC OP 191 Residual household waste per household.	trend only	112kg	none set	Cumulative Figure	MC OP 191 Residual household waste per household. Months Target (Months) O kg O kg O kg	Figures for the first 3 months of the year have improved year on year. Thus is due in part to an updated number of households being used in the calculation of the final figure. The number of households used prior to this had been sourced from a 2014 value and had been used consistently for a number of years. A process has now been set up where the waste figures will be based on the number of households according to the VOA at the end of each month, thus will be a much better assessment

The East Herts aspect of the contract is operating well with only minor increases in missed bins collections. A true reflection of this figure will be obtained for Aug/Q2 figures as discussions have now taken place with the contractor to ensure a consistent approach to data collection.

This is due to a change in regime for data collection from the old contract to the new contract. Now that the 3 month settling in period is over and clarity has been provided over agreed methods of data collection, there is an expectation this figure to reduce in Q2.
