## Non-Financial Risks – Evening Charging and Amended Daytime Charging

| Issue   | Mitigation Strategy   | Comments  |
|---|---|---|
| 1. Source data  |   |   |
| Assumptions based on<br>manual evening<br>counts. The margin of<br>difference between<br>these is 5%. A further<br>margin for error should<br>be allowed for with<br>such a small number of<br>sample counts<br>extrapolated to a full<br>year income.  | Monitor evening pay and<br>display income closely and<br>use <i>actual year one figures</i><br>to refine budget estimates.  | By extending 30 minutes of<br>free parking to all tariffs the<br>Council hopes to at least<br>break even and achieve a<br>revenue neutral position.<br>The Council is not<br>anticipating a net increase in<br>income from the combined<br>proposals. |
| 2. Price sensitivity to<br>evening enforcement<br>(customer<br>resistance)  | None possible.<br>Monitor.  | On-street capacity is self-<br>limiting and may already be<br>fully occupied.   |
| Customer resistance<br>likely. Possible<br>displacement to<br>on-street or even other<br>towns.   | Additional enforcement as<br>required following<br>observation at additional<br>cost to the Council,<br>impacting net balance of<br>initiative to have a cost<br>impact (negative) on the<br>Council. | Additional enforcement is<br>required to ensure<br>compliance and safe and<br>clear streets, proposals have<br>been put forward in the<br>report.   |
| 3. Resident permit parking schemes  |   |   |
| Many schemes cease<br>to operate at 1800.<br>There is a risk that to<br>avoid evening charges<br>some motorists will<br>park in residential<br>streets. This may<br>generate complaints<br>and may lead some<br>residents to request an<br>extension to the hours<br>of operation of their<br>scheme. | Monitor.<br>Possible need to revisit<br>operating hours of some<br>resident permit parking<br>schemes.  | Cost of revision to Traffic<br>Regulation Orders,<br>estimated at £2,000 per<br>separate TRO, plus revisions<br>to signs and forms.   |

| Issue  | Mitigation Strategy                           | Comments   |
|--|---|--|
| 4. Compliance  |   |  |
| Most single yellow<br>lines cease to operate<br>at 1830. These are<br>likely to be fully parked<br>leading to increased<br>risk of cars parking on<br>double yellow lines or<br>otherwise in<br>contravention. | Deliver appropriate levels<br>of enforcement. | Current yellow line<br>restrictions established by<br>the County Council are to<br>reflect road use and maintain<br>effective and safe passage.<br>Full use of non-restricted<br>parking should not impact<br>this. If following<br>implementation issues do<br>arise then full monitoring and<br>proposals may need to be<br>progressed with the County<br>Council, requiring Traffic<br>Regulation Orders, with the<br>time and budget required.<br>Additional enforcement is<br>required to ensure<br>compliance and safe and<br>clear streets, proposals have<br>been put forward in the |
| 5. Exceptional car<br>parks  |   | report.  |
| Certain car parks<br>cannot easily sustain<br>an evening charge,<br>because of lease<br>agreements (J Square)<br>or a free parking<br>arrangement (Grange<br>Paddocks and<br>Wallfields Visitor Car            | Excluded from income assumptions.             | Unlikely to happen in<br>Jackson Square as the<br>customer is still paying; it is<br>just that EHC will not receive<br>that payment.<br>Unlikely to happen in<br>Wallfields Visitor Car Park as<br>too far from centre of town.  |
| Park).<br>Above car parks may<br>become<br>oversubscribed as a<br>result of being<br>effectively free to use.  | Monitor.                                      | Greatest risk in Grange<br>Paddocks.   |

| 6. Resident/hotel<br>use of car parks   |  |  |
|---|--|--|
| Some town centre car<br>parks used by<br>residents and hotel<br>guests overnight.   | Permits for residents/hotel guests? At additional administrative cost.   | Administrative burden would<br>be considerable.<br>Concessions would reduce<br>amounts available for<br>daytime tariff changes.  |
| Pay and display ticket<br>purchased after 1830<br>commences 0730 the<br>next charging day.  | Require people to<br>purchase pay and display<br>ticket after 2100 if they<br>require this service.  | Current use of this facility is<br>likely to be more significant<br>than we think.   |
| 7. Capacity   |  |  |
| Increasing 'dwell time'<br>during the day may<br>decrease turnover<br>through less availability<br>of parking spaces<br>close to town, which<br>may lead to capacity<br>shortfalls and motorist<br>dissatisfaction. | Monitor.<br>Possible need to<br>re-designate car parks.<br>Possible need to augment<br>off-street supply –<br>particularly in Bishop's<br>Stortford. | Increasing dwell time and<br>ensuring adequate turnover<br>are two sides of the same<br>coin and one must not be<br>allowed to predominate at<br>the expense of the other. |
