

## Essential Reference Paper B

Issue	Representations made	Officer comment
Changes to the Conservation Area Boundary.	The respondent supports the amendments to conservation area boundary in three areas but objects to the removal proposed at the eastern entrance to the village. The respondent notes that 'the lane represents a historic route into Green Tye and unites the cottages to which it serves. It identifies the extent of the previous green verge. The original conservation area boundary is justified on historical and visual grounds'	The area of land the respondent wishes to remain within the Conservation Area is a small untidy grassed area situated between an open arable field and the road and is of limited visual importance. The suggested change is considered to be a more sensible boundary better related to current features.
