

## **ESSENTIAL REFERENCE PAPER 'D'**

Thank you for consulting environmental health on the above temporary event notice application.

We have reviewed this application and have concerns regarding the noise associated with amplified music from this location.

There are neighbouring residents very close by in Great Amwell and Stanstead St Margarets, the rural location has relatively quiet background noise levels and an event that's held over an extended weekend until 23:00 could cause significant noise disturbance to the local residents.

I appreciate a noise management plan has been submitted in line with this application, however as we cannot condition TENs then the contents of this plan could only form an informal agreement and as such cannot be relied upon as a sufficient noise control.

I therefore object to this TEN and advise this application is dealt with through the premises licencing route in line with the current application that has been submitted.

Yours Sincerely

Claire Spendley

Senior Environmental Health Officer
