

Council notes its severe disappointment in the Prime Minister Boris Johnson.

Council further notes that the Prime Minister acted unlawfully, misled Parliament and lied to the residents of our country.

Council adds that while the Prime Minister attended Downing Street parties, millions of people, including countless East Herts residents, obeyed the lockdown rules, often at huge personal cost. They missed funerals, cancelled weddings and said goodbye to loved ones on video calls – some on the very day that Number Ten illegally hosted a garden party.

Council condemns the Prime Minister whose disregard for his own rules itself represents a threat to the health of our nation, including residents of East Herts as he failed to set an example for the country to follow. This is also a threat to the rule of law and the standing of democracies at all levels. For these reasons he must resign.

Council calls upon the Leader of the Council to write to Boris Johnson stating that the council has no confidence in his leadership and calls for him to resign.

Council resolves that we no longer have confidence in the Prime Minister.
